# Enterprise Strength

Chuanbo technology Enterprise strength

## Honesty·Innovation·Win-Win Situation

### **Chuanbo Technology in China Rooted in China's fully automatic retail, entertainment machine industry center of Guangdong Panyu**

Guangzhou Chuanbo Information Technology Co., LTD. (hereinafter referred to as: Chuanbo Technology) was formally established in 2015, is a leading intelligent commercial equipment, production, sales and operation, has passed ISO9001 quality management system certification, international CE / SGS / RoHs certification, China quality CCC / CQC certification, etc.; is committed to provide superior products for the global market, let more consumers feel the beauty of technology for life.

### ▼ Focus on smart new retail equipment manufacturers

With years of accumulation and precipitation in the technology industry, the company focuses on more intelligent and more segmented commercial automation equipment, serving an integrated enterprise. Independent developed more than 100 terminal and program software, background data management software, various kinds of vending machine operation software and equipment to produce different project products, with more than 20 "appearance patent", "utility model patent" and other technical products; in 2020 has won the "technology little giant" high-tech cultivation enterprise. In 2021, it was awarded AAA China Integrity Entrepreneur, AAA Integrity Management Demonstration Unit, China Integrity supplier credit Enterprise...and so on.

# Research & Development Strength

Chuanbo technology with intelligent, platform, highly customized characteristics  
Our company has been leading the market innovation in the same industry

01

## System independent research and development

- ①20 + scientific research elite
- ②Deep cultivation industry for many years
- ③Independent research and development of more than 100 terminals and program software
- ④Background data management software.

02

## Cloud server software

- ① With 10 years of above industry design and manufacturing experience of the professional team.
- ② It can provide customers with rich and diversified design and manufacturing, docking customers' third-party software, and realize customer software customized development docking.

03

## Equipment development programming

- ①Strong research and development team, intelligent equipment it is a complex system, must have a scientific design program, has dozens of patents in this field, leading other competitors in the industry.

04

## Intelligent design

- ①It has gathered domestic outstanding talents in the automatic field, used scientific research and development system to build a high efficiency and high quality research and development team, and won a number of national patents in the industry.

# Company Strength

川博科技

10,000 square meters of manufacturing base

At present, the global sales of cotton candy machine has reached 10,000 + units

## Finished product workshop group

Each equipment is after hundreds of testing and shipment, domestic and foreign customers can customize design services.

## Assembly workshop group

International standard, large-scale pipeline production, high production efficiency; technology constantly update iteration, machine stability, more powerful performance.

## Accessory testing group

Craftsmanship quality requirements, to ensure the quality of products, to ensure the performance and quality of each product.

## Finished product shipment group

To provide each customer with excellent product and later upgrade services.

PART THREE

# Product Operation

---

Product operation

Based on China to serve the global market is widely praised by customers!

Chuanbo Technology in the world ——

The cotton candy machine has been put into use in over 80 + countries and regions.

- ... Today, the automatic cotton candy vending machine has sold more than 80 countries and regions, throughout Europe, Britain, Spain, Germany, Italy, France, Netherlands, Portugal, Canada, United States, Mexico, Kuwait, Sweden, Ireland, Bulgaria, Brazil, Colombia, Argentina, Israel, Australia, Russia, Thailand, Singapore, Malaysia, Japan, South Korea and other landmark mall; with good product operation
- ... construction network, let users feel the business value created by technology.

In the market, we use experience to serve customers and professional products, measuring the depth of development; in the future, Chuanbo Technology will adhere to product quality control, strengthen product development and upgrading, constantly provide more intelligent and cost-effective products, linkage enterprises, customers and operators to win-win.

With craftsmanship, creating value and leading the future, Chuanbo Technology has been forging ahead!

# Product Operation

Business benefit | Achieve safe, rapid and continuous growth **Profit income**.  
Our products occupy the advantages of female consumption and parent-child consumption.

- \* In the market consumer subject, women and parent-child activities occupy the top of the pyramid, and the emotional impulse determines their consumption desire.
- \* In the era of epidemic, the foreign epidemic remains high, and the domestic epidemic is sporadic, leading to the continuous contraction of the travel range of Chinese people.

In the next 3-5 years. Local entertainment, doorstep entertainment, shopping mall entertainment will be the mainstream of domestic consumption economy; whether shopping malls, organizers of various amusement activities or merchants, all need to realize the value of projects with good drainage effect, safer operation and quick revenue benefit.

## American shopping malls

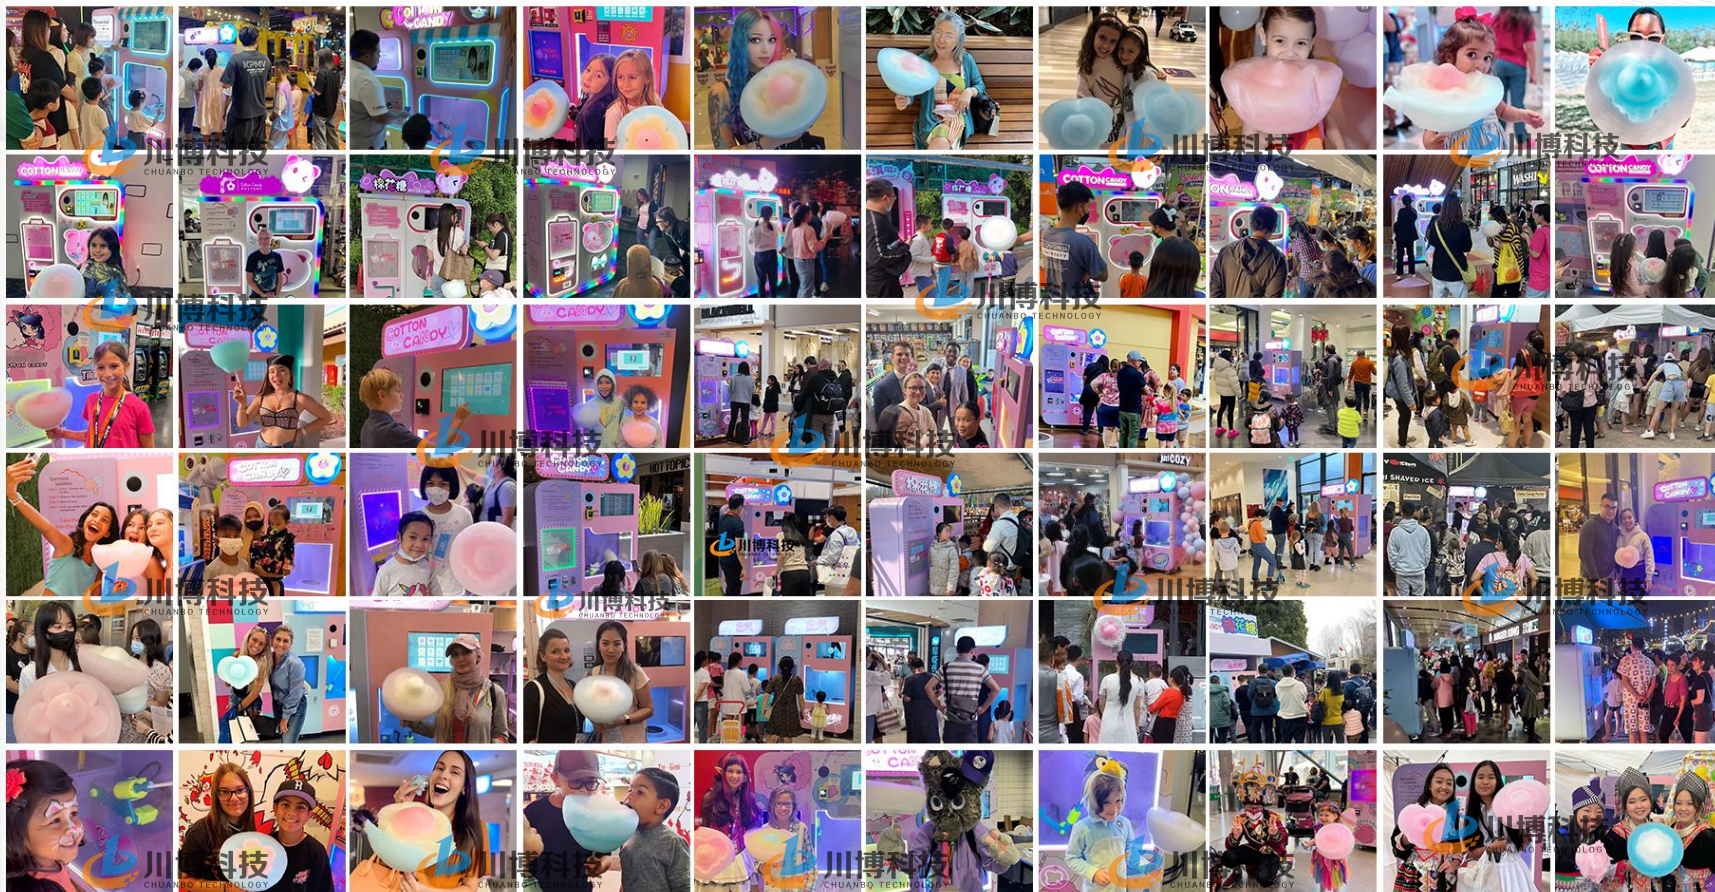

## Exhibitions in Brazil

Chuanbo technology automatic cotton candy selling machine, will be the choice to adapt to this blowout consumption!

PART FOUR

# Service & Support

---

Service and support

# Powerful Intelligent Background

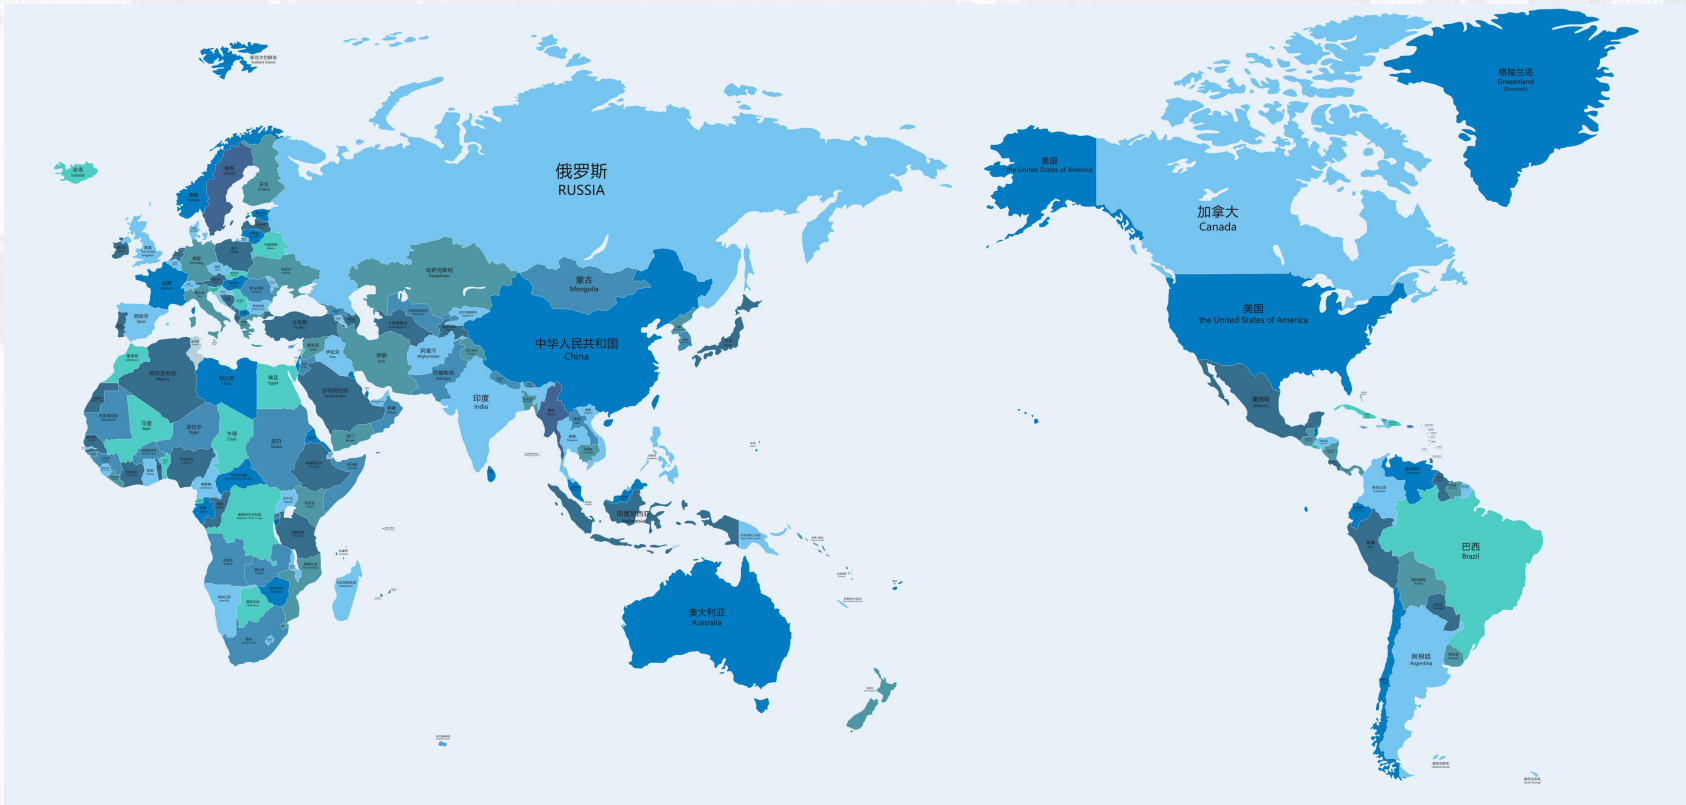

**Our cloud service platform has been connected to tens of thousands of retail terminals, stable network online operation on several servers,**

**The largest server has nearly 10,000 machines running online at the same time.**

**The annual turnover reaches hundreds of millions of yuan, and the annual sales of goods are nearly hundreds of millions of transactions, serving nearly 200 million person-times.**

# Service Advantage

Professional after-sales personnel more than one service, all day online service.

# After-sales Service Commitment

## 1. Quality assurance service

The machine guarantees one year for lifetime maintenance, after-sales engineer remote guidance and response, machine problem determination and problem solving.

## 2. Time of service

To replace parts, issue within 24 hours.

## 3. Professional guidance

After-sales training plan: after the installation and debugging, organize the equipment management and operation personnel to conduct remote teaching and training (including machine delivery principle, parameter setting, practical operation and daily maintenance, daily operation management, etc.) until the equipment management personnel are fully familiar with it.

## 4. One-to-one service

After the machine reaches the destination, contact the after-sales specialist within 24 hours to guide the installation and debugging of the machine remotely.

## 5. Professional after-sale

If after-sales problems that cannot be solved by telephone guidance, send after-sales engineers to provide them if necessary.

## 6. Carefree service

At the same time, the machine operator can regularly organize the key operation personnel to our company for more systematic learning and training, and our company can give lectures and make systematic explanations at the assembly site.

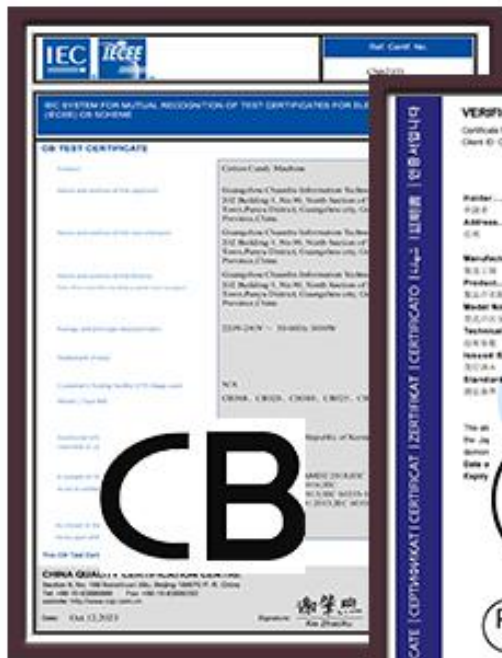

## Dozens of certificates and patents
